

MITEL

## Two Companies. One Direction.

Do you want your business to be truly ultra thin?  
With Mitel and Oracle it can be.

We may be two distinct companies. But we share one clear direction: more freedom and flexibility. We offer a unique opportunity to access both your voice and desktop settings with a single smartcard via a Mitel IP phone and Sun Ray™ thin client — and to combine business communications applications on Oracle's integrated Sun server. Our combined solution will revolutionize your computing and voice workstation.

### Voice and Data with Mitel Unified IP Client for Sun Ray

Imagine the revolutionary power of a single smartcard driving your access to all your voice and desktop applications. To truly integrate voice and data, Mitel has taken the Oracle Sun Ray virtual desktop technology and turned it into a slim module that snaps securely onto Mitel IP phones. The Mitel Unified IP Client for Sun Ray™ provides one simplified, device-secure authentication source for voice and data hot desking.

By combining the Mitel IP phone thin client modules with the Sun Ray, you get unprecedented flexibility. Freeing you to work anywhere by simply inserting your smartcard into a Mitel Unified IP Client for Sun Ray from any location—instant access to your telephony features and personal desktop. Everything is centralized at the back office—making management highly efficient and effective.

The smartcard controls all your voice and data access—and using it allows data to stay centralized and secure in the back office. An unprecedented level of security—and freedom—for your company-sensitive data that lets you work anywhere worry-free.

Even better, the reduced need for power—replace a desktop PC with the Sun Ray and you can drop up to 75 watts—allows instant reduction of operating expenses and your carbon footprint.

#### Mitel Communications Director on Oracle Sun Server

Define a perfect voice and data experience: a rich 30-year history of call control and exceptional industry-standard servers. With the addition of Sun products and technologies, Oracle now offers the most complete, open, and integrated business software and hardware systems available—from applications to disk.

Porting Mitel's award-winning Mitel Communications Director software and associated business communications applications on the Oracle line of integrated Sun servers reduces the need for proprietary boxes and enables organizations to streamline its operations.

It's the perfect package for all businesses looking to reduce install times; get secure, centralized management; and lower their total cost of ownership.

#### It's the Old Adage: Do More with Less

Predicting the future can be easy, but making the future come to life in the here-and-now takes a deeper understanding of what is relevant and applicable. The rich understanding and innovative leadership of business communications that Mitel brings to the table and the combined Sun and Oracle expertise are the right ingredients to deliver the very simple idea of doing more with less.

Now you can get an innovative IP communications solution that merges voice and data hot desking with an energy efficient virtual desktop solution from Oracle. The back end telephony is provided by the Mitel Communications Director running on X86 Oracle's Sun servers.

Mitel and Oracle—together—deliver an innovative and user-friendly solution that pares down the size and energy demands and ramps up the flexibility and mobility.
