IMPORTANT SAFETY INSTRUCTIONS

To prevent personal injury and reduce risk of fire, electrical shock, damage to other equipment or to the building, read this Safety Instruction before installing, maintaining or servicing any part of the equipment.

Pay attention to all safety regulations and read the labels, warnings and notes posted on the equipment.

Persons involved in the installation or maintenance of the equipment shall fulfil the level of authorized installer (has knowledge of the equipment) or, preferably, qualified installer (trained and certified by Mitel). For a definition of the term installer, see Section 2 Definitions.

When using your telephony equipment, basic safety precautions should always be followed to reduce the risk of fire, electrical shock and injury to persons.

Be sure to

- Read and follow given instructions of the equipment installation instruction(s).
- Properly secure the equipment to the building to prevent the equipment from falling or tipping over, causing personal injury or damage to other equipment.
- Secure that the transportation covering and other shipping material does not pollute the environment. Send it back to the local provider or recycle it.
- Install this equipment in a location and an environment for which it is designed.
- Secure that socket-outlets are installed near the equipment and that they are easily accessible for service persons.
- Operate this product only with the correct power source type indicated. If uncertainty of the type of power supplied to the building, consult with the local dealer or the local power company.

Do not

- Perform any changes or modification not expressly approved by responsible for compliance. Unauthorized changes or modification could void the user's authority to operate the equipment.
- Use the telephone to report a gas leak in the vicinity of the leak.
- Place this product on an unstable cart, stand or table. The product may fall and cause personal injury or damage to the unit.
- Use the equipment near water, for example near a sink or in a wet basement, or use liquid or aerosols on the product. Use a damp cloth for cleaning.
- Spill liquid of any kind on the product.

- Block or cover any equipment's slots and vents. Do not place the product on a surface that would cause the vents to be blocked. If the ventilation is blocked, there is a risk for overheating.
- Install this product near or over a radiator or heat register, in a cabinet, wall unit and so on unless proper ventilation is provided.
- Remove or cover hazard symbols as this can endanger persons working with the product.
- Overload wall outlets and extension cords as this can cause fire or electrical shock.
- Allow anything to rest on the power cord. Do not place the power cord where it could be walked on.
- Push any object through the equipment slots. Short circuit or contact with parts at dangerous voltage can cause fire or electrical shock.
- Disassemble the product. Contact qualified service agency when service or repair work is required.
- Connect outgoing/incoming lines to the equipment from other buildings, without, at each building entry point, using surge protection.
- Tamper with the warranty seal on the back of the phone. Tampering with this seal can void the warranty.

Be aware

- That rotating fan blades may exist that can cause injury to body parts that come in contact with the blades.

Avoid

- Using a telephone (other than cordless type) during an electrical storm.

There may be a remote risk of electrical shock from lightning.

Disconnect the equipment from the power source and contact qualified service personnel under the following conditions:

- Power supply cord or plug is damaged
- Any liquid has been spilled on the equipment
- The equipment has been dropped or a card has been damaged
- The product does not operate in accordance with operating instructions provided or exhibits a distinct change in performance. Do not adjust controls not described in operating instructions. Improper adjustment of controls may result in damage to equipment.

SAVE THIS SAFETY INSTRUCTION

DEFINITIONS

Installer/Service Person

A person having appropriate technical training and experience necessary to be aware of hazards to which that person may be exposed in performing a task and of measures to minimize the risks to that person or other persons.

User Any person, other than a service person.
