If the system displays 'Island Mode', the secondary server service will be restarted. The primary server service will not be affected, and must be restarted manually, along with the Web Agent service in order to return to normal mode from Island Mode.
MIVC-1301	Periodically, Reply Emails are not sent to External Email address.
MIVC-1477	"Range Check Error" when opening Agent Manager.
MIVC-1835	Caller Name shown as "unknown" in interactions when recently provisioned.
MIVC-1931	Maritime Canada/Atlantic UTC -4 time zone added.

Known issues fixed in MiVoice Connect Contact Center build 508.10.3320.0	
Defect Number	Description
ENG-579209	Intermittent Contact Center process failure.

RESOLVED ISSUES in MiVoice Connect Contact Center

Known issues fixed in MiVoice Connect Contact Center build 508.10.3300.0	
Defect Number	Description
ENG-460406	Foreign characters (UTF8) might show up garbled in the Interaction Center.
ENG-495099	Blank AIC page displayed if there is a space at the beginning or end of a username.
ENG-529100	AIC Queue Monitor only displays first 12 CP fields programmed.
ENG-548662	Dial List retry on busy timer not working correctly.
ENG-560265	Queue calls are not displaying in IE 11.
ENG-562378	An email was not re-queued correctly after a system restart.
ENG-563417	The Start Queue Time basic call profile is missing in Contact Center Director.
ENG-563658	An idle agent was not receiving queued email until performing a release/resume.
ENG-564284	Contact Center process failure.
ENG-564917	Outbound email accounts were going down on a busy system.
ENG-566737	The Start Wait Time basic call profile is missing in Contact Center Director.
ENG-567786	JRE error encountered when logging into Supervisor GCCS application with Windows 10.
ENG-567844	Calls that are queued ahead of live calls but had been made into callbacks are delivered out of order.
ENG-568923	Email process failure on server startup when an invalid/incorrect reply account configured.
ENG-571279	Contact Center process failure.
ENG-571345	Intermittent audio cutoff for calls in queue that have been transferred to Contact Center from an analog device.
ENG-573294	Callback request was looping when last agent in callback group logged out, causing high CPU utilization.
ENG-574519	"ACD calls transferred by agent" column does not increment correctly for blind transfers to non-monitored extensions or external destinations.
ENG-574857	ACD email can stop working if there is invalid/incorrect reply account configured.

RESOLVED ISSUES in MiVoice Connect Contact Center

ENG-575907	Chat messages are not rendered when double quotes are used in the conversation.
ENG-575971	Some ACD emails were not routing when the connection to the mailbox was flapping.
ENG-576138	AIC goes to white screen when Agent gets conferenced with a non-monitored extension.
ENG-576521	Queue Monitor information will not always align with column headers when a supervisor does not have an agent account.
ENG-576706	Process failure occurred while changing email configuration during an email handling.

Known issues fixed in MiVoice Connect Contact Center build 507.85.3221.0

Defect Number	Description
ENG-538591	"DNIS calls accepted" in 12.1 DNIS by Interval report are over-reported if the call is interflowed from the no agent destination.
ENG-549795	Intermittent IVR process failure.
ENG-554849	Agents intermittently logged out of Interaction Center.
ENG-556774	File "libetpan-stream-debug.log" is created if there is a "tmp" folder in root of server C drive.
ENG-556871	Caller Name is 'Unknown' on Agent Interaction Center from an agent that is hot desking. (Agent extension is not assigned in CC Director, and agent enters extension when logging in AIC).
ENG-561192	Call ended, and agent was stuck in wrap with no display of remaining wrap time nor an option to end it or extend it.
ENG-563510	Email status is sometimes not marked correctly in the database causing the system to be very busy on a restart.
ENG-563662	Email process failure after changing the SMTP configuration on an account with a large amount of emails in the inbox (over 2000).
ENG-567950	Email can stop routing on a busy system.

Known issues fixed in MiVoice Connect Contact Center build 507.85.3200.0

Defect Number	Description
ENG-489854	Additional logging for issue of CCIR data not being written intermittently.

RESOLVED ISSUES in MiVoice Connect Contact Center

ENG-514544	"Avg ACD Ring Time" continued to accumulate incorrectly for a call that interflowed out of Contact Center.
ENG-526503	CCIR would not upgrade to Connect for one customer with "CCIR could not connect to the ECC Server" error.
ENG-528943	Agents intermittently logged out of Interaction Center.
ENG-529094	Caller was stuck in a script "get digits" action when configured timeout did not function.
ENG-548430	Contact Center IVR process failure.
ENG-548523	Predictive interflow routing not functioning.

Known issues fixed in MiVoice Connect Contact Center build 507.84.8207.0	
Defect Number	Description
ENG-357358	Agent "External Outgoing NACD calls" are reported as "Internal Outgoing NACD" calls when PBX Account Code is used.
ENG-491908	Ability to make an internal database change to a value other than the 12 or 24 months of data retention configurable in Contact Center Director.
ENG-496282	Local calls to an IRN are disconnected for one customer.
ENG-502976	Scheduled Reports lag by 2 hours on systems with Europe/Paris time zone configured. Example: A report scheduled for 12:15 will not generate until 14:15.
ENG-510730	Cannot add release codes after default codes are deleted on a new ECC installation.
ENG-511295	Email internal timer process leak.
ENG-512958	Agent Manager username character limit increased from 40 to 64 to match Contact Center Director limit.
ENG-517520	Replication breaks every night after successfully re-synching during the day.
ENG-523352	The last agent in AIC cannot be seen when a large number of agents are chosen.
ENG-526081	DNIS events are not written to the CCIR database if DNIS names have more than 16 characters.
ENG-526596	When using the Popup URL Feature, scroll bars do not appear in IE 11 and Firefox.
ENG-526783	Changing the chat port from default 8080 breaks chat functionality.

RESOLVED ISSUES in MiVoice Connect Contact Center

ENG-529088	Some scripts must be re-saved after a system restart in order to route correctly for customers with a very high number of script IDs (greater than 600).
------------	--

Known issues fixed in MiVoice Connect Contact Center build 507.84.5100.0	
Defect Number	Description
ENG-490398	ACD email calls are taking up to 60 seconds to arrive in agent's In Box when unexpected email header information is encountered.
ENG-492845	Real-time reporting engine process failure.
ENG-497367	No warning message is displayed if a customer attempts to initiate a chat using IE and high privacy settings.
ENG-501914	Interaction Center states not refreshing intermittently.

Known issues fixed in MiVoice Connect Contact Center build 507.84.3705.0	
Defect Number	Description
ENG-467967	Abandoned call count slightly higher on Real-Time Daily Summary vs. Historical Group by Interval report.
ENG-489264	When supervisor help request is made, agent's "Supervisor Help" icon does not change color to green.
