What's New in Mitel Revolution 2019.3

This document describes the new features and functionality now available in the latest release of Mitel Revolution 2019.3.

Scheduler Enhancements

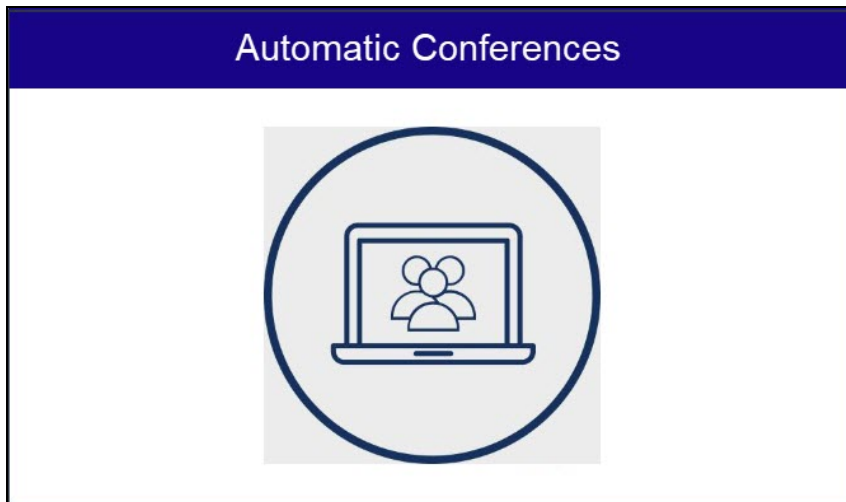

Setting up a calendar schedule just got easier with two new features: **Day Templates & Day Copy**! Users can create Day Templates to automatically create events. In addition, users can create multiple day templates and apply them to the appropriate schedule days. To do so, simply right click on a day of events and select *Copy Day* to copy all of that day's events to another day on the same or different calendar. Users can also delete an entire day of events. See the *Scheduler Help* topic for all the details.

The screenshot displays the Mitel Revolution Scheduler interface. On the left is a navigation sidebar with icons for Dashboard, Notifications, Scheduler, Configuration, System Status, Users Contacts & Sites, Logging, Global Settings, and Help. The main area is titled 'SCHEDULER' and shows 'Washington Announcements' with a 'Hide Templates' button. Below this is a section for creating templates with buttons for 'Afternoon Bells w Tardy', 'Blue Day', 'Morning Assembly', 'Morning Assembly', 'Morning Assembly', 'Morning Bells w Tardy', 'New Template', and 'Red Day'. A message '4 event(s) saved' is visible in the top right. The calendar view shows a grid for September 2019, with days of the week as columns and dates as rows. Events are shown as orange bars with times, such as '08:00:30 am Tutori' and '08:00:30 am Early R'. A mouse cursor is hovering over the event on Thursday, September 12th.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2 08:00:30 am Tutori	3	4 08:00:30 am Tutori	5 08:55:00 am Mornir 09:00:00 am Mornir 09:55:00 am Mornir 10:00:00 am Mornir	6 08:00:30 am Early R	7
8	9 08:00:30 am Tutori	10	11 08:00:30 am Tutori	12 08:00:30 am Early R	14	
15	16 08:00:30 am Tutori	17	18 08:00:30 am Tutori	19	20 08:00:30 am Early R	21
22	23 08:00:30 am Tutori	24	25 08:00:30 am Tutori	26	27 08:00:30 am Early R	28
29	30 08:00:30 am Tutori	1	2 08:00:30 am Tutori	3	4 08:00:30 am Early R	5
6	7 08:00:30 am Tutori	8	9 08:00:30 am Tutori	10	11 08:00:30 am Early R	12

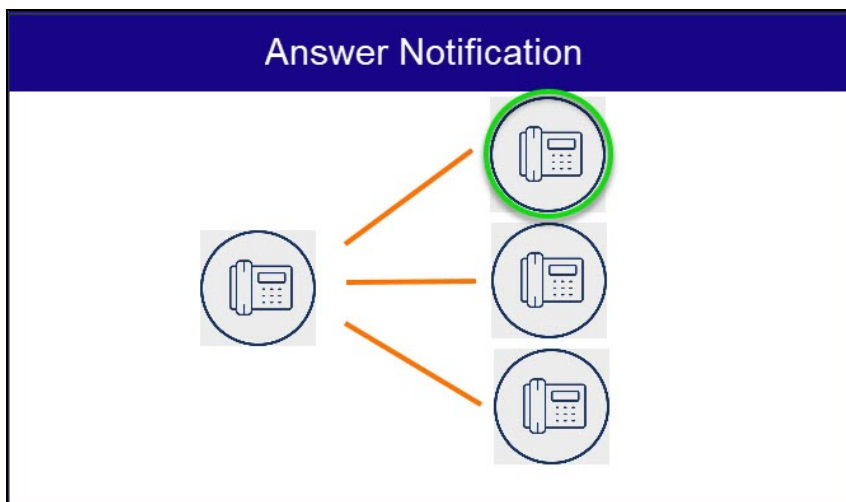

Auto-Conference

Mitel Revolution Conference notifications allow users to create a conference that automatically joins predefined users and allows additional users to be added in on-the-fly. Conference notifications are triggered by dialing an assigned SIP line number. *See the Mitel Revolution Web Help for more details.*

Answer Notification

Broadcast a message to multiple IP phones and speakers requesting for an answer. Once a recipient presses the "Accept" soft key on a phone, all other endpoints are dropped from the notification leaving, the caller (*notification initiator*) and recipient in two-way communication.

Notable Highlights

The following are the other highlights from release 2019.3:

- **Auto-license endpoints used in notifications** – In large-scale systems, managing which endpoint licenses need to be enabled or disabled can be time consuming. This feature enhancement allows users to run a daily check to automatically enable or disable endpoint licenses based on their use in notifications. *This is an optional feature that must be enabled in your Global Settings.*
- **Enhancements made to support NWS County CAP Feeds** – *CAP NWS feeds can now be monitored based on multiple NWS zone codes and/or FIPS6 geocodes. We have also updated our zone codes to the October 2019 version provided by the NWS. For most reliable results, filter CAP NWS triggers on multiple zone codes and geocodes to cover your area. NWS zones change frequently; if a zone that you want to monitor is not listed in our search results when setting up an NWS trigger, you can enter the zone as a custom value in Revolution. Please review the National Weather Service Alerts Help topic and review your existing NWS feeds.*
- **Background music for Mitel XML enabled phones** – You can now configure a service URL with a background music stream to play music provided by an external source. Once the streaming source is active, phones can subscribe to the service and activate the background music by selecting the service button.
