Wireless LAN Stand Support	Yes (see Note 20)	Yes	No	5212, DM 5215, 5312 only	DM 5220, 5224, 5324 only	No	No	No	No	No	Yes	No	No

**WARNING: Using the 5207 IP Phone and a headset without a Plantronics M12 Vista Universal Amplifier might cause hearing damage.**

**NOTES:**

- 01)** Mitel Networks 5207 IP Phones DO NOT support the direct connection of a headset. Use of a headset with this phone requires a Plantronics M12 Vista Universal Amplifier. The amplifier plugs into the handset port on the underside of the phone and allows the user to adjust the headset volume level. Plantronics models P51, P81, P101N, and Supra NC headsets are the ONLY headsets approved by Mitel for use with the 5207 IP Phone through the Plantronics M12 Vista. For optimum audio quality, set the M12 volume control to a low setting (1 to 3). Higher settings will degrade the audio quality.
- 02)** A Group Page cannot be received by a 5220 IP (Dual Mode) Phone that has a Line Interface Module installed in it.
- 03)** Teleworker support for Navigator requires Teleworker Release 4 or later.
- 04)** Functionality is limited or is provided differently than a non-YA phone.
- 05)** Functionality is supported on master only.
- 06)** Only Automatic Camp-on is supported on the 5302 IP Phone.
- 07)** The "Phonebook with Location" option is supported on the 5212, 5224, 5304, 5312, 5320/5320e, 5324, 5330/5330e, 5340/5340e, and 5360 IP Phones.
- 08)** The 5304 supports the same set of features supported by the 5312 IP Phone. Some features are not recommended because of certain limitations, mainly the lack of softkeys and indicators (LED), and inaccessible DTMF dial pad.
- 09)** Call Forward Cancel All is only supported as a feature access code that can be programmed as a speed dial key.
- 10)** Audio coding: ITU-T Rec. G.722.1 Annex C, licensed from Polycom®
- 11)** The PC port is enabled by default, but can be disabled by Class of Service, except on the 5505 SIP Phone and 69xx IP Phones where it's always enabled.
- 12)** Teleworker support for the 5304 requires firmware 2.1.1.2 or later.
- 13)** IP/SIP devices can invoke Whisper Coach via MITAI-based applications.
- 14)** 5140 IP, and 5240 IP provide the Call History functionality. See the "Call History for 5xxx IP Appliances and Your Assistant" Help topic for details.
- 15)** It is recommended that for these sets, you use the Call History Application (not the Feature).
- 16)** For Call History functionality on this device, see "Call History for 5xxx IP Appliances and Your Assistant" Help topic.
- 17)** For Call History on these sets, see the appropriate device's User Guide.

MiVoice Business Feature Matrix  
(Release 8.0 SP2)

- 18) The 6905 IP Phone supports Line Type and Appearances, but does not support LED on its keys.
- 19) Arabic language is not supported on 5304, 5312, 5324, 5320, 5330, 5340 and 69xx IP phones. Chinese language is not supported by this feature.
- 20) Supports Mitel Wireless LAN Adapter.
- 21) Not supported on 6920 and 6930 sets while the user is active on a headset call.
- 22) Blocked on 6920 and 6930 IP Phones with an active headset call.
- 23) Emulates 5020 IP Phone. For more information on MiContact Desktop Ignite, refer to the *MiContact User Guide*.
- 24) Restricted display for the Last Group Member Routing (LGMR) feature.
- 25) Firmware not supported by the MiVoice Business system. You can manually provide the firmware support through an external TFTP server. For more information, see the MiVoice Business Migratuin Guidelines document.
- 26) Softkeys on the 6905 and 6910 IP Phones are supported through the Navigation Cluster.
- 27) Only phones that are supported on Containers-based MiVoice Business (cMiVB).
