# 1 REVISION HISTORY

## 1.1 [VERSION 4.1.9: APRIL 23, 2021](#)

- Rebranded the document from ShoreTel to Mitel format

## 1.2 [VERSION 4.1.8: AUGUST 23, 2016](#)

- Server: If license was lost there was no grace period. Now there is a three day grace period before the loss of the license causes the service to stop allowing pages

## 1.3 [VERSION 4.0.1: AUGUST 28, 2017](#)

- Web Site setup would fail on Server 2016 due to launch condition mistakenly only comparing first digit of IIS version.

## 1.4 [VERSION 4.1.7: AUGUST 23, 2016](#)

- Server: Added additional logging to try to spot why we seemed to lose some settings at one customer's site.

## 1.5 [VERSION 4.1.6: MAY 10, 2016](#)

- Admin: Changed Group dialog to allow multi-select to speed up adding large number of members to groups.

## 1.6 [VERSION 4.1.5: APRIL 1, 2016](#)

- Server: Update to COM object version 4.5.32 to make sure we don't have memory issue with the COM object.

## 1.7 [VERSION 4.1.4: JANUARY 14, 2016](#)

- Server: Timeout related to member calls were not enabled.

## 1.8 [VERSION 4.1.3: NOVEMBER 23, 2015](#)

- Server and Admin: When a new group was associated with external page(s) at the time of creation the settings were not retained.

## 1.9 [VERSION 4.1.2: NOVEMBER 16, 2015](#)

- Admin: Tweak to admin to address crash when creating page without setting a group.

## 1.10 [VERSION 4.1.1: OCTOBER 8, 2015](#)

- Admin: Tweak to admin to address crash when accessing settings.

## 1.11 [VERSION 4.1.0: OCTOBER 8, 2015](#)

- Added support for interfacing with External Paging systems in addition to internal stations.

**Note!** Because this version uses a new database schema current groups will not be carried over an upgrade cycle. Customers should document their current groups before upgrading and then recreate them following the upgrade.

## 1.12 VERSION 4.0.0: JUNE 10, 2015

- First release of the new version which replaces the previous version of the application.
- Significant changes include:
  - Separate Windows Admin client to replace the current web site used to create and edit group details.
  - Admin client can be installed on the server PC or any PC on the same network as the server to provide remote administration.
  - Server now support pre-recorded as well at text to speech based pages that can be pre-configured and easily triggered in several ways.
  - New command line utility can be used to send a pre-recorded audio, text to speech audio or phone messages to a group.
  - Web site simplified to only support sending pre-recorded, text to speech and phone message pages to groups.
  - New admin can be used to configure a weekly schedule that can automate pages for applications like school bells or store opening/closing announcements and so on. Support for defining holidays and marking schedule items as to whether they play on a holiday allows schedule flexibility and consist handling of exceptions.
