

## Aastra S850i USB Audio Connector Kit Quick Start Guide

**The Aastra S850i USB Audio Connector Kit (87-00061AAA-A) includes a USB audio dongle and the necessary cables to connect the Aastra S850i Wireless Base Unit to a computer.**

To use the Aastra S850i USB Audio Connector Kit:

1. Plug the Stereo end of the cables into the USB audio dongle and the Mono ends into the Aastra S850i Wireless Base Unit. Ensure that the Headset Output of the USB audio dongle is connected to the Auxiliary Input (i.e. AUX IN) port of the Aastra S850i Wireless Base Unit, and the Microphone Input of the USB audio dongle is connected to the Auxiliary Output 1 (i.e. AUX OUT1) port of the Aastra S850i Wireless Base Unit.
2. Connect the USB audio dongle to your computer. When the connection is made, the operating system should automatically detect the USB audio dongle as an audio device and load the required drivers. No additional software is required to be installed on the computer.
3. On the Aastra S850i Dialer, navigate to Menu > Setup > Advanced Setup > Advanced Audio > Aux Audio and ensure that Aux Out is set to LINE. Both Aux In and Aux Out must be set to ON in this menu to enable audio functionality.
